charities are more effective, and some aren't. Some are bringing higher impact, some aren't.

Circle Acts started with the objectives to help high-impact donors to filter out lower-impact charities and recommend those we believe are bring impact. We don't compare causes to which ones are more important vs less important. We evaluate **Canadian charities that support India** the same way we evaluate the charities that support **local community housing**. We evaluate Art focused charities the same we evaluate **scientific research charities**, we evaluate **animal charities** the same we evaluate **poverty reduction charities**. **We just have one goal – which charities are bringing high-impact?** We have a **High-Impact Philanthropy rating methodology** which consists of qualitative and quantitative information.
